

# V-TEQ

V-TEQ™. AUSTRALIAN DESIGNED AND MANUFACTURED BY THERAPOD.

V-TEQ™ is ideal for pillows, mattresses and overlays and a wide range of medical applications, as the foam softens and conforms to the precise shape of the warm contact surface.

This ensures even pressure distribution and temperature management, increasing circulation, and offering a superior comfort level than has been available at anytime before.

# Why is V-TEQ™ unique?

Conventional polyurethane foams are two dimensional whereas V-TEQ™ has four dimensions:

## Density

This refers to the weight of the foam per cubic metre. This is the most important measure when grading the quality of the foam; the higher the density, the higher the foam quality.

V-TEQ™ foams are very high density, ranging from 60kg per cubic metre (V-TEQ™ Deluxe Comfort foam), to 85kg per cubic metre (V-TEQ™ Premium Comfort foam).

## Hardness

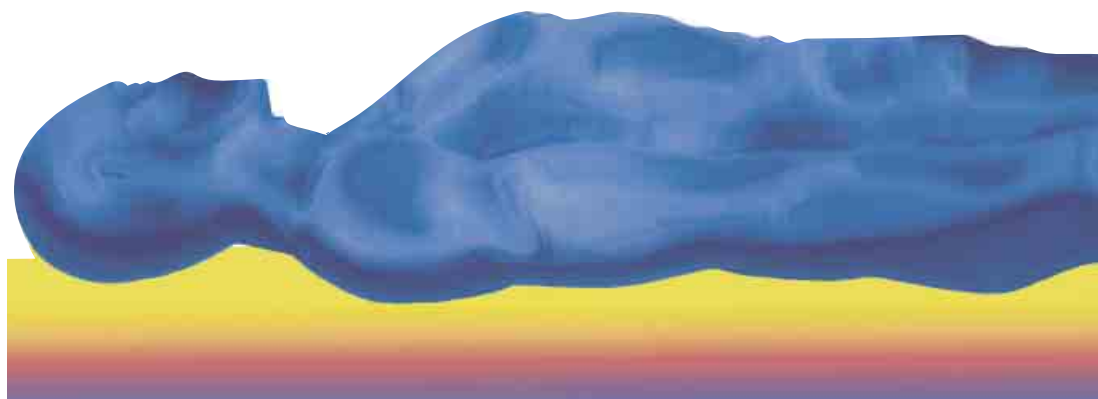

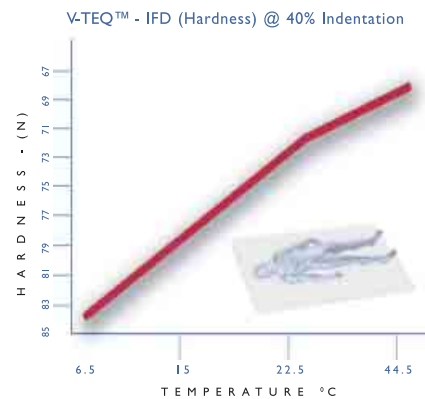

This is a measure of how the foam feels, not of the quality. Higher quality foams such as V-TEQ™ maintain their hardness levels for longer periods.

## Temperature

V-TEQ™ foams react to temperature. The higher the temperature, the softer the foam feels. The hardness and resilience change according to the temperature of the foam.

## Time Effects

The rate of recovery is slower than conventional foams, but it does fully recover without any lasting impression.

## Healthguard

V-TEQ™ foams are manufactured with the Healthguard™ additive. This provides you with protection against allergies and asthma, by killing dust-mites, and eliminating the food sources such as moulds and bacteria that mites thrive on.

It is the faeces of Mites which trigger allergies, and by eliminating these from your bedding, it is a key factor in preventing asthma.

The active ingredient of Healthguard™ is permethrin – an environmentally sound compound developed as an improvement upon the characteristics of the pyrethrum daisy.

## Recycling and the Environment

In developing our V-TEQ™ product range, we have committed to maintaining an environmental approach to how your products are disposed of at the conclusion of their life-cycle.

Instead of ending-up as land-fill, we will make arrangements for your mattress and pillows to be crushed and used as materials for carpet underlay.

## Rebate on next purchase

When you return your old V-TEQ™ product to us for recycling, we shall give you a rebate on the purchase of your new pillow or mattress.

This rebate shall be credited from the cost of your next purchase of a V-TEQ product. Please contact your local V-TEQ stockist for specific rebate details.

## The V-TEQ™ System

To maximize the quality of your sleep, we have developed three electric bedding systems that work in conjunction with the V-TEQ™ pillows and mattresses.

Select the one which best suits your bedroom design as well as meeting your specific function and comfort levels.

## COCA Endorsement

Our V-TEQ™ pillow and mattress proudly carries the endorsement of the Chiropractic and Osteopathic College of Australasia, as does our Postureform Electric Bed.

COCA promotes professional excellence to its wide member base, ensuring that patients who visit a COCA practitioner are benefiting from the most current information, research and related developments.

## Warranty

The V-TEQ™ products carry extended warranties – giving you peace of mind that you have purchased a quality product.

The V-TEQ pillow has a five year warranty, and the V-TEQ mattress has a ten year warranty.

# The V-TEQ™ Product Range

V-TEQ™ products are available in two choices of comfort level for you to select the best product for you to sleep on: Deluxe Comfort Foam, Premium Comfort Foam

## V-TEQ™ Pillows

Code	Description	Foam Type
